

Charge Controllers DIN Rail Mounting Kit

The top-hat rail mounting kit allows easy mounting of solar charge controllers on a top-hat rail. The set consists of two retaining brackets and two screws. The retaining brackets are screwed to the charge controller using one screw per bracket. This then allows the solar charge controller to be positioned on the top-hat rail and clicked into place. The brackets can be easily retrofitted to solar charge controllers.

Product features:

- Simple installation
- Best reliability

Fitting and construction	
Dimensions (X x Y x Z)	7.2 mm
Weight	2.4 g
