

**WEB-Catcher**  
**SILENTWIND**  
communication with green energy

The lightweight SW2DK tilt-pivot swivel base made of high-strength nylon provides a firm grip through its four-point screw connection. With the handy turning device on the holder, the antenna can be quickly and easily tilted 2x 90 ° in both directions. The standardized 1" x 14 BFS thread is compatible with our antennas. The cable guide on the thread allows the insertion of the cable even if a connector is already mounted on the cable.

Color: white

Swivel range: 180°

Material: nylon

Base area: 102 x 62 mm

Hole size: 83 x 45 mm

Thread: 1" 14 gears BFS

IP68: weather and UV resistant
